Day 3: Task 2 5
Day 4: Task 1 6
Day 4: Task 2 7
Course Notes 7
Additional Information 8

Day 1: Task 1

Please research the different versions of Tableau, compare and contrast them below and explain the limited functionality on 'Tableau Public'.

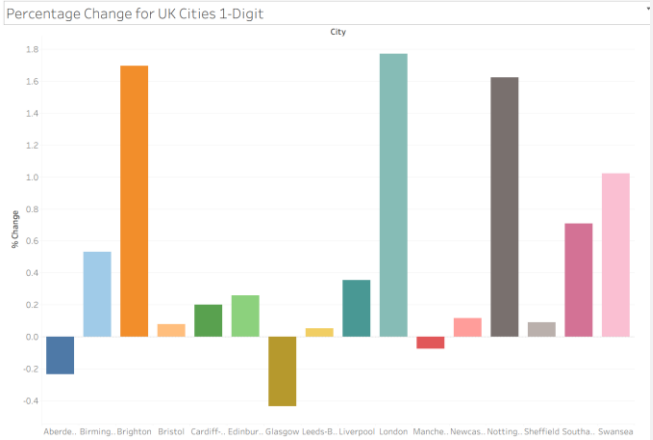
Different Tableau versions	The main versions of Tableau are Tableau Public, Tableau Desktop, Tableau Reader and Tableau Cloud/Server. Tableau Desktop and Tableau Cloud/Server are expensive as it requires subscriptions whereas Tableau Public and Tableau Reader are free to download and use. Tableau Desktop allows connection to any database whilst Tableau Public has all the data saved to a public server which means that anyone can see them. Tableau Reader can't create or edit whilst Tableau Public is a creation tool. Limited functionality on Tableau Public is to do with is there is a limit to how much data it can hold, you can't connect to many databases, your data must be refreshed manually and you can't

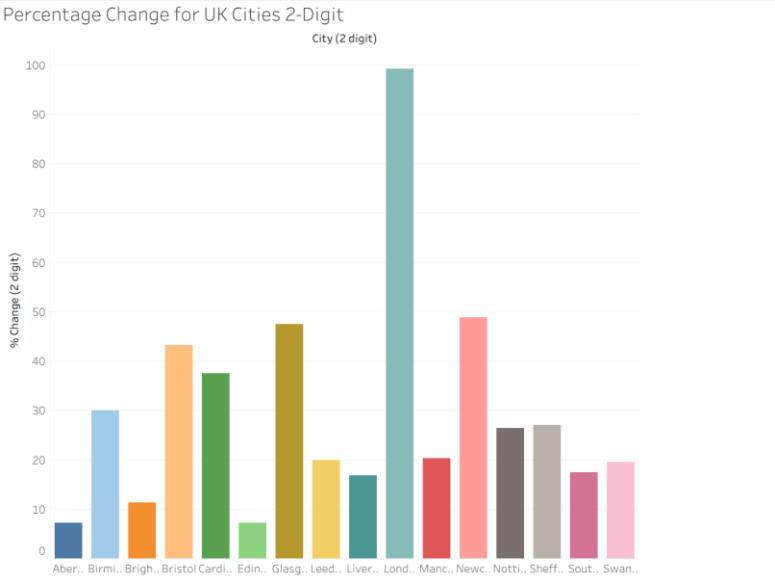
save things onto your computer(folder) as they must be saved to Tableau Public Cloud which makes it easily accessible. Therefore, this means there is very little security in terms of protecting your data.

Day 1: Task 2

Using the *EMSI_JobChange_UK* dataset, create your own dashboard, I want to see a bar chart showing percentage change and a UK based map showing the key city locations impacted.

Paste your print screen here





Day 2: Task 1

Using the Spotify data set, conduct an analysis to find trends and key information that could be used by an organisation for future projects.

There is no set scope for the analysis, simply to find trends and document them below:

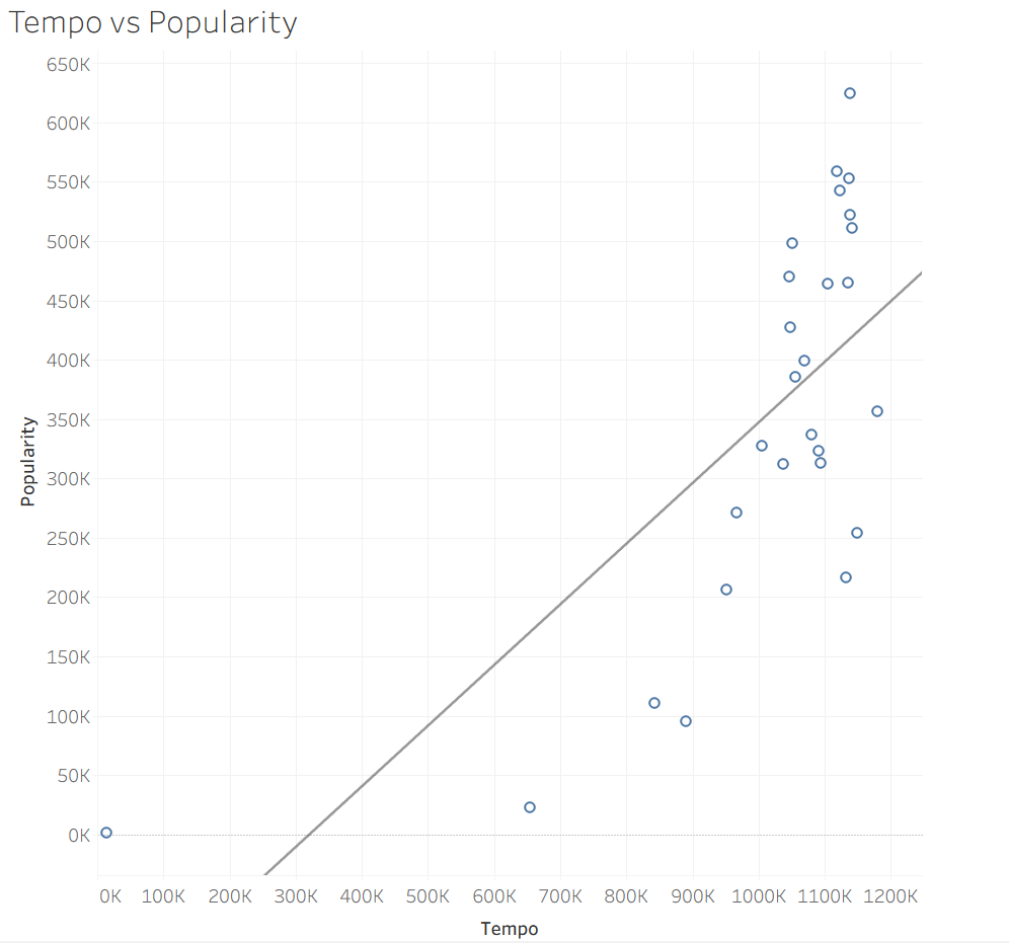
Avg. Tempo



What did you find?

In the first picture, we can tell that Ska is the most energetic on average, whilst Opera has the lowest energy on average.

In the second picture, we can tell that World and classical music have the highest duration time on average whilst children's music, ska and soundtrack have the lowest duration time on average.

In the third picture, we can tell that Hip-Hop has the highest danceability with rap and reggaeton coming after. Acapella has the lowest danceability. This could be because it relies on a person instead of an instrument to provide the sound to dance to

In the fourth one, 9th wonder has the highest average tempo with 175.6 whilst 2-Pac has the lowest average tempo with 102.6. 2-Pac prefers slower beats for his songs whilst 9th wonder usually prefers higher and more energetic beats for his songs

In the last picture, there is a weak positive relationship between tempo and popularity as the line is trending upwards, but the points aren't that close to the trend line. As tempo increases, popularity increases. Though this relationship is inconsistent and unreliable at its core.

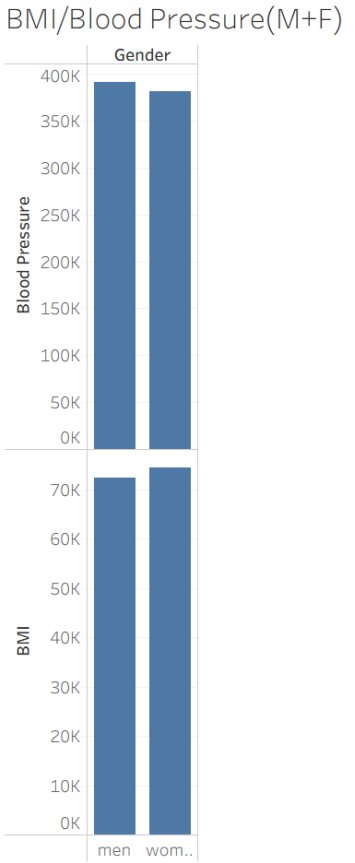
Day 2: Task 2

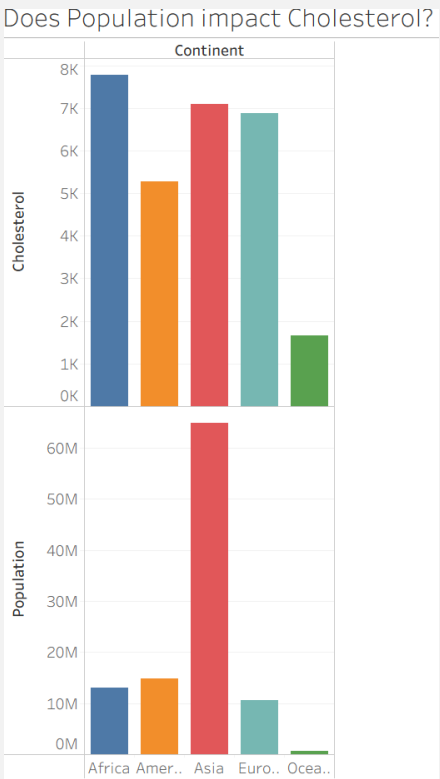
Using the Health, conduct an analysis to find trends and key information that could be used by an organisation for future support.

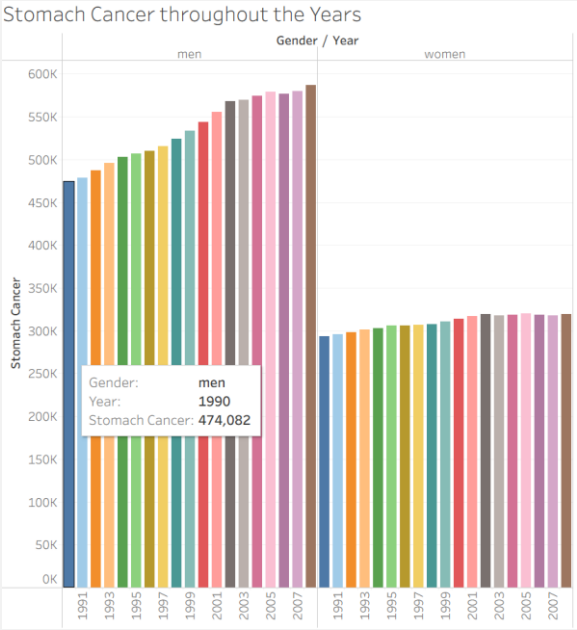
There is no set scope for the analysis, simply to find trends and document them below.

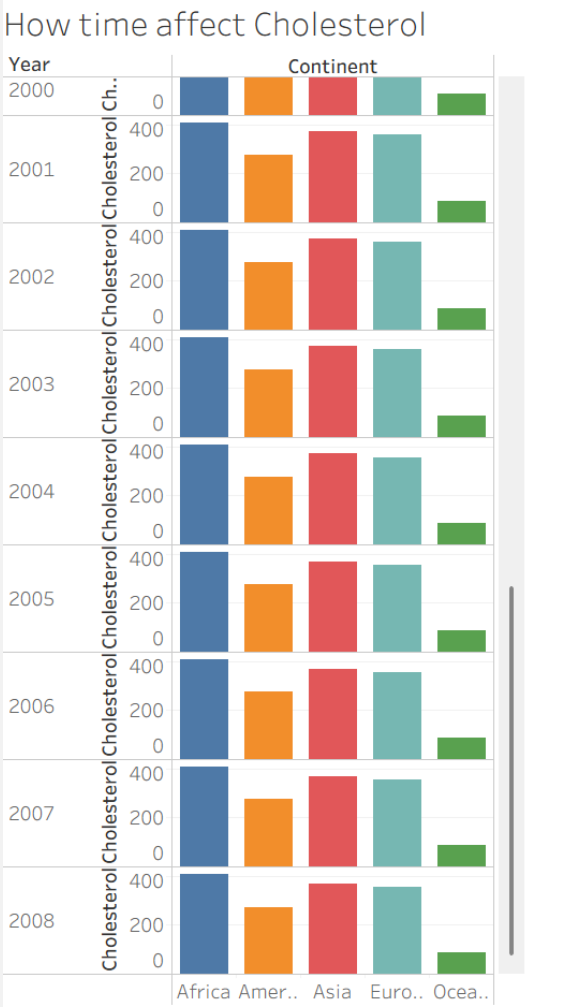
- Data can be lifesaving and is being used more within the NHS, reflect on how this data could support decision making for the NHS.

Paste your print screens here









What did you find and any reflections on how the NHS could use this?

I found out that men have higher blood pressure compared to women. This could be due to men having higher levels of testosterone.

I found out that Africa, Europe and the Americas have the highest levels of cholesterol. This could be because of lack of physical activity and the sort of foods they eat

In the third picture, I determined from it that as time goes on more men have stomach cancer whereas as time goes on stomach cancer for women remain around similar levels

In the last graph we can deduce that as time goes on cholesterol levels gradually decline throughout the different continents. This could be because less people smoke and less people ate

processed foods. Also, there wasn't many means of transport earlier on which meant people would walk more. This results in more physical activity and reasonable cholesterol levels

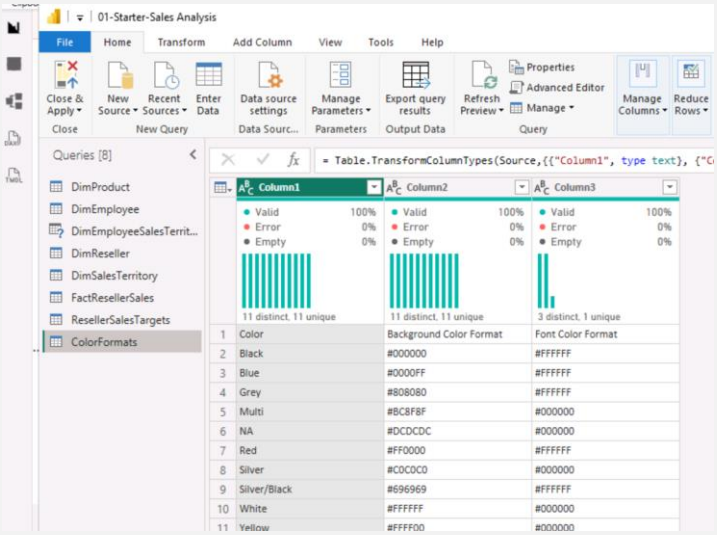
Day 3: Task 1

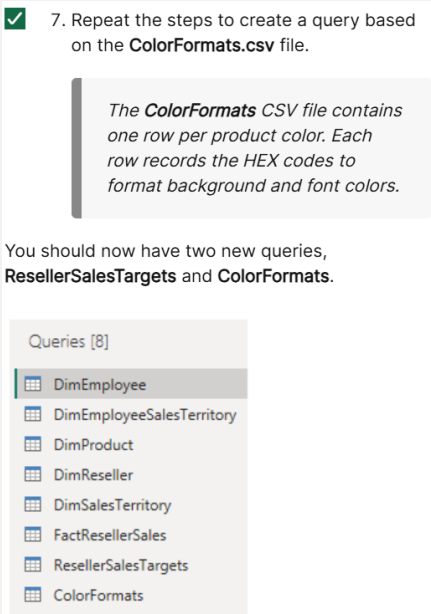
Please complete Lab 1 'Get Data in Power Bi Desktop'. Once complete, paste a print screen below and in the collaboration board.

"Teaching is the best way to learn, so please listen out for support requests from the class and we'll work through the challenges together"

Paste your completed lab here

This image is proof of me completing the last task before completing my lab





After completing this step, I have completed lab 1 'Get Data in Power Bi Desktop'

Please see below

Lab complete

You may choose to save your Power BI report, though it's not necessary for this lab. In the next exercise, you'll work with a pre-made starter file.

- [ ] 1. Navigate to the **"File"** menu in the top left corner and select **"Save As"**.
- [ ] 2. Select **Browse this device**.
- [ ] 3. Select the folder where you want to save the file and give it a descriptive name.
- [ ] 4. Select the **Save** button to save your report as a .pbix file.
- [ ] 5. If a dialog box appears prompting you to apply pending query changes, select **Apply**.
- [ ] 6. Close Power BI Desktop.

☑ 1

Get data in Power BI (Expected Duration 2 hours)

PL-300T00-A Design and Manage Analytics Solutions using Power BI [Cloud Slice Provided], Lab 01

Required: Yes

Started: 27 January 2026 20:26 (Central Standard Time)

Ended: 27 January 2026 22:06 (Central Standard Time)

Launch

9 of 10 launch attempts remaining

I have now completed Lab 1 'Get data in Power BI' as there is a tick in the box besides '1'

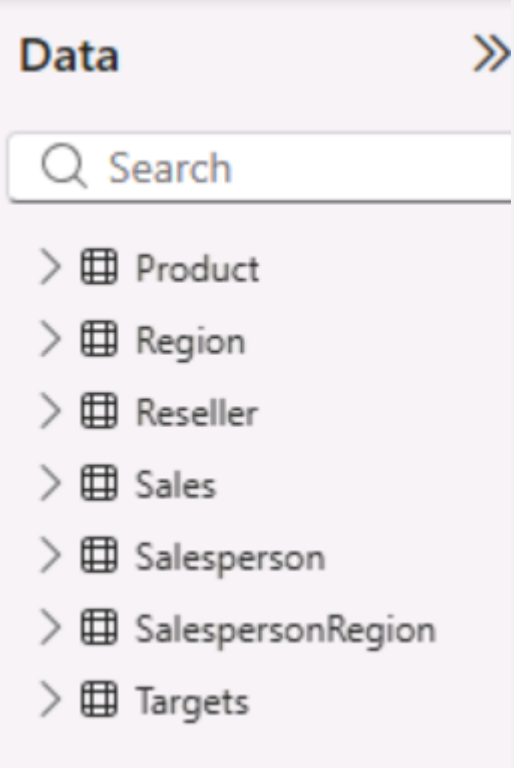
Day 3: Task 2

Please complete Lab 2 'Load Transformed Data in Power BI Desktop'. Once complete, paste a print screen below and in the collaboration board.

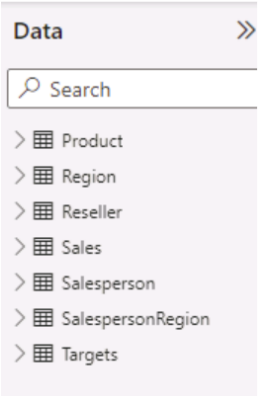
"Teaching is the best way to learn, so please listen out for support requests from the class and we'll work through the challenges together"

Paste your completed lab here

This image is proof of me completing the last task before completing my lab



3. You can now see the canvas in Power BI Desktop, with Filters, Visualizations, and Data panes on the right. In the Data pane, notice the **7 tables** loaded to the data model.



After completing this step, I have completed lab 2 'Load Transformed Data in Power Bi Desktop'

Please see below

Lab complete

You may choose to save your Power BI report, though it's not necessary for this lab. In the next exercise, you'll work with a pre-made starter file.

1. Navigate to the **"File"** menu in the top left corner and select **"Save As"**.
2. Select **Browse this device**.
3. Select the folder where you want to save the file and give it a descriptive name.
4. Select the **Save** button to save your report as a .pbix file.
5. If a dialog box appears prompting you to apply pending query changes, select **Apply**.
6. Close Power BI Desktop.

2

Clean, transform, and load data in Power BI (Expected Duration 2 hours)

PL-300T00-A Design and Manage Analytics Solutions using Power BI [Cloud Slice Provided], Lab 02

Required: Yes

Started: 28 January 2026 08:34 (Central Standard Time)

Ended: 28 January 2026 10:28 (Central Standard Time)

Launch Cancel

8 of 10 launch attempts remaining

I have now completed Lab 2 ‘Clean, transform and load data in Power BI’ as there is a tick in the box besides ‘8’

Day 4: Task 1

Please complete Lab 8 'Design a Report in Power BI Desktop'. Once complete, paste a print screen below and in the collaboration board.

"Teaching is the best way to learn, so please listen out for support requests from the class and we'll work through the challenges together"

Paste your completed lab here

Lab complete

You may choose to save your Power BI report, though it's not necessary for this lab. In the next exercise, you'll work with a pre-made starter file.

- [ ] 1. Navigate to the **"File"** menu in the top left corner and select **"Save As"**.

- [ ] 6. Close Power BI Desktop.

☑ 12

(Optional) Create dashboards in Power BI (Expected Duration 2 hours)

PL-300T00-A Design and Manage Analytics Solutions using Power BI [Cloud Slice Provided], Lab 12 (CSS)

Required: Yes

Started: 30 January 2026 06:11 (Central Standard Time)

Ended: 30 January 2026 07:17 (Central Standard Time)

Launch

9 of 10 launch attempts remaining

I have now completed Lab 12 '(Optional) Create dashboards in Power BI' as there is a tick in the box besides '12'

Course Notes

It is recommended to take notes from the course, use the space below to do so, or use the revision guide shared with the class.

We have included a range of additional links to further resources and information that you may find useful, these can be found within your revision guide.

END OF WORKBOOK

Please check through your work thoroughly before submitting and update the table of contents if required.

Please send your completed work booklet to your trainer.
